

Providing Comprehensive Protection for a Financial Services Company

After a theft of client data and a data protection audit that created more questions than it answered, ESID Consulting conducted an independent, organisation wide risk review for a financial services company. We then designed and assisted in implementing an Information Security Management System (ISMS) to provide comprehensive protection for the business and its most sensitive information.

Pain Points

- Company experienced an IT and physical security breach, with confirmation that an insider stole client information
- Breach significantly affected company's business
- Needed to secure the entire enterprise to avoid a repeat and satisfy regulators and other stakeholders
- Management and security of information had been neglected due to rapid growth in the company

Competition

- Company had already contracted another supplier. The report received wasn't what the client wanted. ESID provided the expertise and support needed

ESID Consulting Solution

- ISO27001 Gap Analysis combined with proprietary Insider and Information Security Risk Assessment
- Unique combination allowed for deployment of holistic employee risk & information security management company wide
- Security compliance across supply chain
- Organisation-wide implementation management visibility and control

ensuring continued
business success after
breach

Protecting the Critical Intellectual Property of a World Leading Aerospace Technology Firm

A leading UK based aerospace firm keeps critical intellectual property safe from bad actors using ESID Consulting's Insider and Information Security programme.

Pain Points

- Company's information and communications are targeted by hackers, competitors & foreign state actors
- Needed secure systems and processes to satisfy government and international partners
- Wanted to find a standards-based solution (ISO27001) with a focus on insider threat

Competition

- Considered multiple solutions but ultimately wanted implementation support to improve information security and minimise employee risk
- Competing options fell short in terms of providing a holistic approach to security and organisational culture

ESID Consulting Solution

- Policy review, revision and creation
- Introduction, test and full operational roll out of insider threat monitoring solution
- Pre-employment screening and employee vetting implemented
- Cyber awareness training provided to all employees
- Incident response, legal advice and digital forensic support

handle employee
and information risk

Enabling Private, Secure Communications for a Global Counter Extremism Organisation

A UK based organisation with a global footprint uses ESID Consulting's IT support partners to build, manage and support their IT network and secure communications around the world.

Pain Points

- An organisation involved across the globe in tackling extremist movements and ideologies. An IT solution was already in place that was not fit for purpose and in need of an overhaul; organisation needed a communications and security solution that leveraged existing technology and infrastructure
- Executives and staff travel overseas in potentially hostile environments, where phone and digital communications are subject to interception and compromise

Competition

- Organisation was already using the services of a long-standing IT provider

ESID Consulting Solution

- Securely configured and restructured existing IT infrastructure
- Implemented a structured IT upgrade programme
- Rolled out secure communications and mobile devices to employees
- Ongoing, first class IT support for the business as it continues to expand

Counter
Extremism
Organisation
with secure

Leverages off the shelf, reliable and secure technology

UK based IT
Support

Providing Computer Forensic and e-Discovery Support to UK Government in the UK and Abroad

A UK government department uses ESID Consulting for digital forensic and e-Discovery expertise to investigate the leakage of sensitive information.

Pain Points

- Confidential and time sensitive government information leaked to UK media
- The source of the leak needs to be identified and the extent of the leak clarified
- Considerable media attention and government scrutiny

UK
Government
requires
e-Discovery
Support

Competition

- ESID Consulting provided the white labelled service for a top tier consulting firm.

ESID Consulting Solution

- Engaged in and advised on investigative strategy meetings with investigators
- Deployed digital forensic specialists to UK and abroad to perform forensic collections
- Conducted deduplication, keyword filtering and other culling of data
- Performed timeline analysis digital forensic & e-discovery investigations.
